

NIRAJ PAUL

SENIOR iOS DEVELOPER | 11+ YEARS EXPERIENCE

Bangalore, India | +91-9942419837 | nirajpaul.ios@gmail.com | LinkedIn: linkedin.com/in/nirajpaul

PROFESSIONAL SUMMARY

Senior iOS Developer with 11+ years architecting and shipping high-performance iOS and tvOS applications for major media, retail, and e-commerce brands, including Tegna Inc., Sony Pictures Network (SonyLIV), Purple, and Fabindia. Deep expertise in Swift, SwiftUI, and Combine, with a track record of optimizing media streaming engines (HLS, AVPlayer, client/server-side DAI), hardening application security (SSL Pinning, OAuth, Keychain), and applying Clean Architecture/MVVM to reduce engineering cycle time. Known for mentoring engineers, improving sprint velocity, and converting design and product requirements into modular, maintainable codebases under Agile delivery.

TECHNICAL SKILLS

- Languages: Swift, Objective-C, Dart (Flutter)
- Frameworks & SDKs: SwiftUI, UIKit, tvOS, Combine, AVFoundation (AVPlayer, AVKit), Core Data, Realm, Core Location, MapKit, CoreML, WebRTC
- Architecture & Patterns: MVVM, VIPER, Clean Architecture, MVC, SOLID Principles, Creational/Structural/Behavioral Design Patterns
- Security: SSL Pinning, Token-based Authentication, Keychain Services, secure storage, OAuth, Encryption
- Tools & DevOps: Fastlane, GitHub Actions, GitLab CI/CD, Xcode, CocoaPods, Swift Package Manager (SPM), Git, XCTest (Unit Testing)
- Integrations & Analytics: Juspay Payment, Stripe, PayPal, Braintree, PubNub, XMPP, Socket.io, Firebase FCM & Analytics, NPAW, Comscore, RudderStack, OneTrust

PROFESSIONAL EXPERIENCE

Senior iOS Developer (Contract) | Wipro Limited (Client: Tegna Inc.) May 2025 – March 2026

- Architected and developed high-performance iOS and AppleTV (tvOS) OTT media streaming applications from scratch using Swift and SwiftUI, delivering content to millions of active viewers.
- Successfully developed and launched three major regional streaming news applications: KING 5 NEWS, WBIR, and 9News.
- Integrated and optimized AVPlayer with HTTP Live Streaming (HLS) for video playback, supporting client-side and server-side Dynamic Ad Insertion (DAI).
- Implemented advanced analytics and compliance SDKs including NPAW, Comscore, RudderStack, and OneTrust for user tracking and consent management.

Senior iOS Developer | NeoSoft Technology June 2021 – April 2025

- Worked as a Senior Developer collaborating with key clients (Sony Pictures Network, purple.com, Fabindia) to build and scale flagship iOS and tvOS apps.
- Sony Pictures Network: Built and maintained the SonyLIV AppleTV app in Swift and SwiftUI, implementing custom UI components and optimizing data fetching for high-concurrency live sports and show streaming, reducing content load time by 20%.
- purple.com: Enhanced core shopping and checkout flows for Purple.com, integrating the Juspay payment SDK and resolving checkout friction points that contributed to a 30% reduction in cart abandonment.
- Fabindia: Architected core retail features for Fabindia using MVVM and Combine, powering real-time catalog updates, search suggestions, and wishlist flows across the app.
- Designed and shipped modular, reusable components across all three client codebases, decreasing feature development cycle time by 30%.
- Hardened application security across client apps by implementing biometric login, token-based authentication, SSL Pinning, and encrypted Keychain storage.

Senior iOS Developer | Sakha Global (Client: Spectra Logic) October 2020 – June 2021

- Engineered the SpectraLogix application, building custom UI components and advanced animations that enhanced app visual appeal and responsiveness.
- Collaborated closely with the UX/UI team to conduct design feasibility reviews, converting design mockups into fluid layouts and decreasing customer UI complaints.
- Partnered with QA teams to implement XCTest unit tests, troubleshoot memory leaks, and profile code to optimize CPU usage.

Senior iOS Developer | Aquarious Technology June 2017 – July 2020

- Promoted to Senior iOS Developer after building foundational client applications; took on architecture ownership and led delivery

of 5 distinct apps for a crowdsourced geofencing client (including See it, Say it, Send it, The Pet Detective, ToDone, Take Stock in Children, and S3 Law Enforcement).

- Integrated CoreLocation-based geofencing to trigger real-time dispatch of emergency media (images, video, PDFs) to localized police centers, supporting time-critical law enforcement workflows.
- Implemented biometric authentication (Face ID / Touch ID) and secure Keychain services across all five apps, reducing unauthorized access incidents.
- Mentored junior developers, introduced code review pipelines, and regularly delivered products ahead of schedule, enhancing overall team sprint velocity.

iOS Developer | Unified Infotech December 2016 – April 2017

- Built and maintained customer-facing iOS applications using Swift and UIKit.
- Designed responsive, adaptive interfaces using Auto Layout and Size Classes, supporting seamless layouts across portrait and landscape orientations.

iOS Developer | Brainium Information Technologies January 2016 – December 2016

- Developed and optimized consumer applications utilizing Swift, Objective-C, and UIKit.
- Worked on UI design execution, API integration, and debugging complex threading issues.

Junior iOS Developer | WebTech Software Solution November 2014 – December 2015

- Programmed custom user interfaces programmatically and integrated REST APIs using Objective-C.
- Maintained legacy applications, resolving memory leaks and updating layouts for newer iOS versions.

EDUCATION

Bachelor of Technology in Information Technology April 2010 – July 2014

B.P. Poddar Institute of Management and Technology
